

Electron Microscopy Core Imaging Facility: Imaging Shared Service

Christine Brantner (cbrantner@umaryland.edu), University of Maryland Baltimore, **Christine Brantner**, University of Maryland Baltimore

The Electron Microscopy Core Imaging Facility on the University of Maryland Baltimore downtown campus provides electron microscopy services such as experimental design consultation, sample preparation and imaging to researchers from the University of Maryland campuses and regional academic and industry partners. We offer TEM and SEM training and imaging services along with sample processing equipment and assistance. Our highly skilled staff will work closely with you to plan and execute your research project.
