

## ABRF Membership Matters

February 2023

### ABRF 2023 Annual Meeting – the *Can't Miss* Event for Core Facilities Professionals – Early Registration extended through 2/28

Now more than ever, the ABRF Annual Meeting is a unique opportunity for ABRF members to connect with peers and learn more about the latest technology developments to empower core facilities.

The 2023 Annual Meeting includes more than three days of content for both early career and highly experienced core personnel. Along with valuable networking events, 2023 Annual Meeting [program highlights](#) include:

- [Keynote presentations](#) by **Beth Cimini**, Broad Institute, MIT and **Edward Boyden**, MIT/HHMI
- **Five** pre-meeting education workshops
- [Plenary](#) and follow-up sessions on:
  - *A Duty to All Life: Creating, Preserving, and Resurrecting Species*
  - *Advances in Single Cell Technologies*
  - *Data Visualization*
  - *Environmental Research and Core Facilities*

- *Non-biological Core Facilities and their Place within ABRF*
- *Spatial Transcriptomics*
- **ABRF Award** Presentation to **Richard Yost** and **Chris Enke**
- Topic-specific concurrent sessions
- **ABRF DEI Award** Presentation: **Tshaka Cunningham**,  
*Future Kings and Queens*
- Updates from **ABRF Research Groups**
- Poster presentations by your ABRF colleagues

No matter your role in your Core, the ABRF Annual Meeting offers timely and valuable programming for you.

The 2023 Annual Meeting will be a hybrid event, with both **in-person** and **remote** registration options available. Virtual registration includes access to daily **LiveStream** sessions and next-day recordings for the balance of the meeting content. Enjoy the value of the program directly from your desktop. Visit the [meeting web site](#) for the latest updates.

[Register](#) today to be a part of one of the highlights of the year.

We look forward to connecting with you at the **ABRF 2023 Annual Meeting**.
